# 875-1210 and 878-1210 Product Announcement May 2020

# 875-1210 and 878-1210

## New Product Announcement

---

### Launch Information

**Launch date:** May 19, 2020

**Open order date:** May 19, 2020

**Shipment date:**

ADT875: June 29, 2020

ADT878: July 31, 2020

**Lead time after shipment date:** 2 weeks

**Product Class:** Industrial

### Overview

- Two separate models covering 100°C to 1210°C with varying capabilities
- Multi-zone temperature control
- Portable, rugged, and quick to temperature
- Process calibrator option provides a multi-channel readout for TCs, switches, task documentation, and HART communication
- Metallic interchangeable inserts
- Color touch screen display
- ISO 17025-accredited calibration w/data included
- Patent pending technology

We understand the many challenges associated with thermocouple calibration work. That is precisely why we decided to introduce the ADT875-1210 Thermocouple Calibration Furnace!

With an unmatched stability, uniformity and an optional on-board process calibrator, calibrating thermocouples has never been easier. With two separate units to choose from, the ADT875-1210 and ADT878-1210 furnaces include a patented multi-zone temperature control provides a never before seen, highly stable and uniform heat source to ensure you get the best possible results from a modest investment. With metallic interchangeable inserts, users have the flexibility needed to service a wide variety of UUT's and the durability they have come to expect from Additel. The ADT875-1210 and ADT878-1210 can be purchased with or without our on-board process calibration electronics to provide flexibility for customers who are needing the best 1200°C heat source on the market.

If thermocouple calibration and/or verification work is part of your workload, you don't want to miss out on this opportunity to save valuable time and money with these best in class furnaces from Additel.

## Distributor Demo Offer

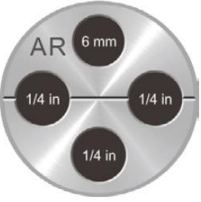

50% off preconfigured demo kits below

Offer expires June 30, 2020

### Demo Kits

Model	ADT878PC-1210-XX-DEMO Reference Grade Thermocouple Calibration Furnace	ADT875PC-1210-XX-DEMO Thermocouple Calibration Furnace
Included Item	ADT878PC-1210-XX-110V or ADT878PC-1210-XX-220V (XX = AR, DR or HR inserts)	ADT875PC-1210-XX-110V or ADT875PC-1210-XX-220V (XX = AR, DR or HR inserts)
Included Item	9915-875 Carrying Case	9915-875 Carrying Case
<b>List Price Total</b>	\$15,345.00 USD	\$12,390.00 USD
<b>Discounted Price</b>	\$7,672.50 USD	\$6,195.00 USD

### Insert Configurations

Reference Style inserts-138 mm(5.43") hole depth
